

Astrophotography *for beginners*

Wide angle astrophotography

As the Sun sets...

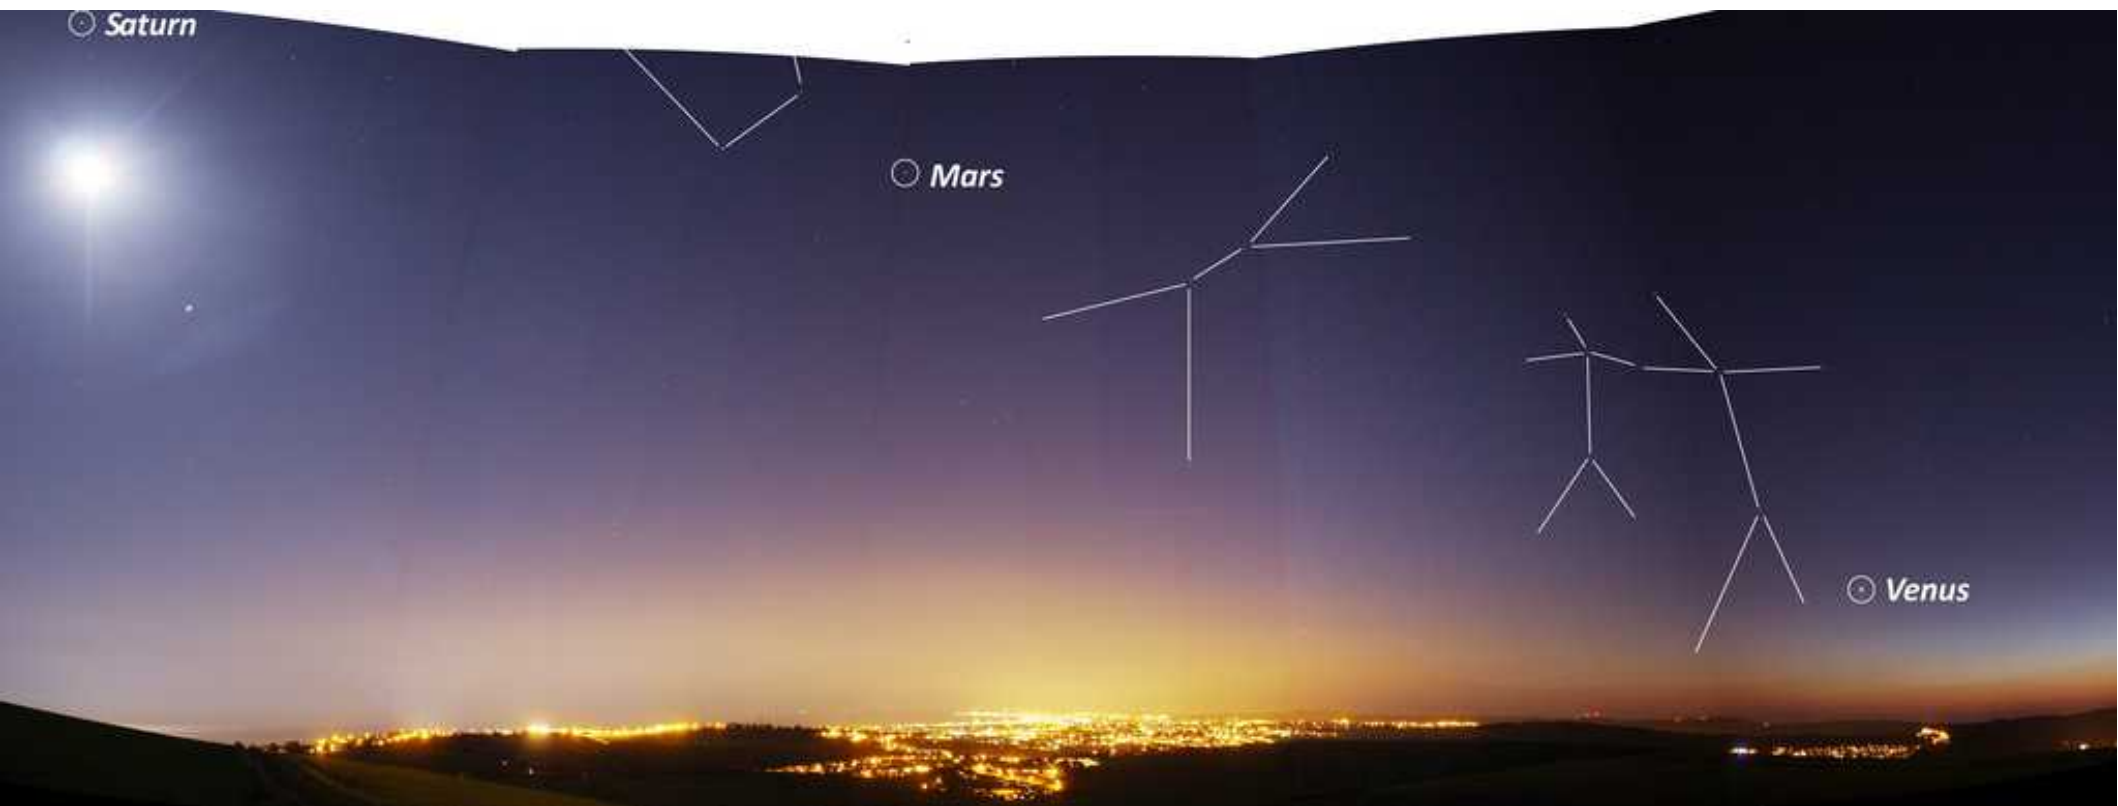

...the Earth's shadow rises (the belt of Venus)

Mars, Saturn & Venus

The ecliptic traces out our flat solar system over the entire sky, as shown in this panoramic

Milky-way over Hawai'i

The Milky way over the Royal Observatory...?!

Milky-way over Sussex

*Milky-way
over Sussex*

A photograph of the Aurora Borealis (Northern Lights) over a snowy landscape. The sky is dark blue with vibrant green and yellow-green auroral curtains. The ground is covered in snow, with some evergreen trees and a small building visible in the distance. The overall scene is serene and majestic.

Aurora: take a Nordic holiday around 2013/4...!

United States Air Force photo by Senior Airman Joshua Strang via Wikipedia

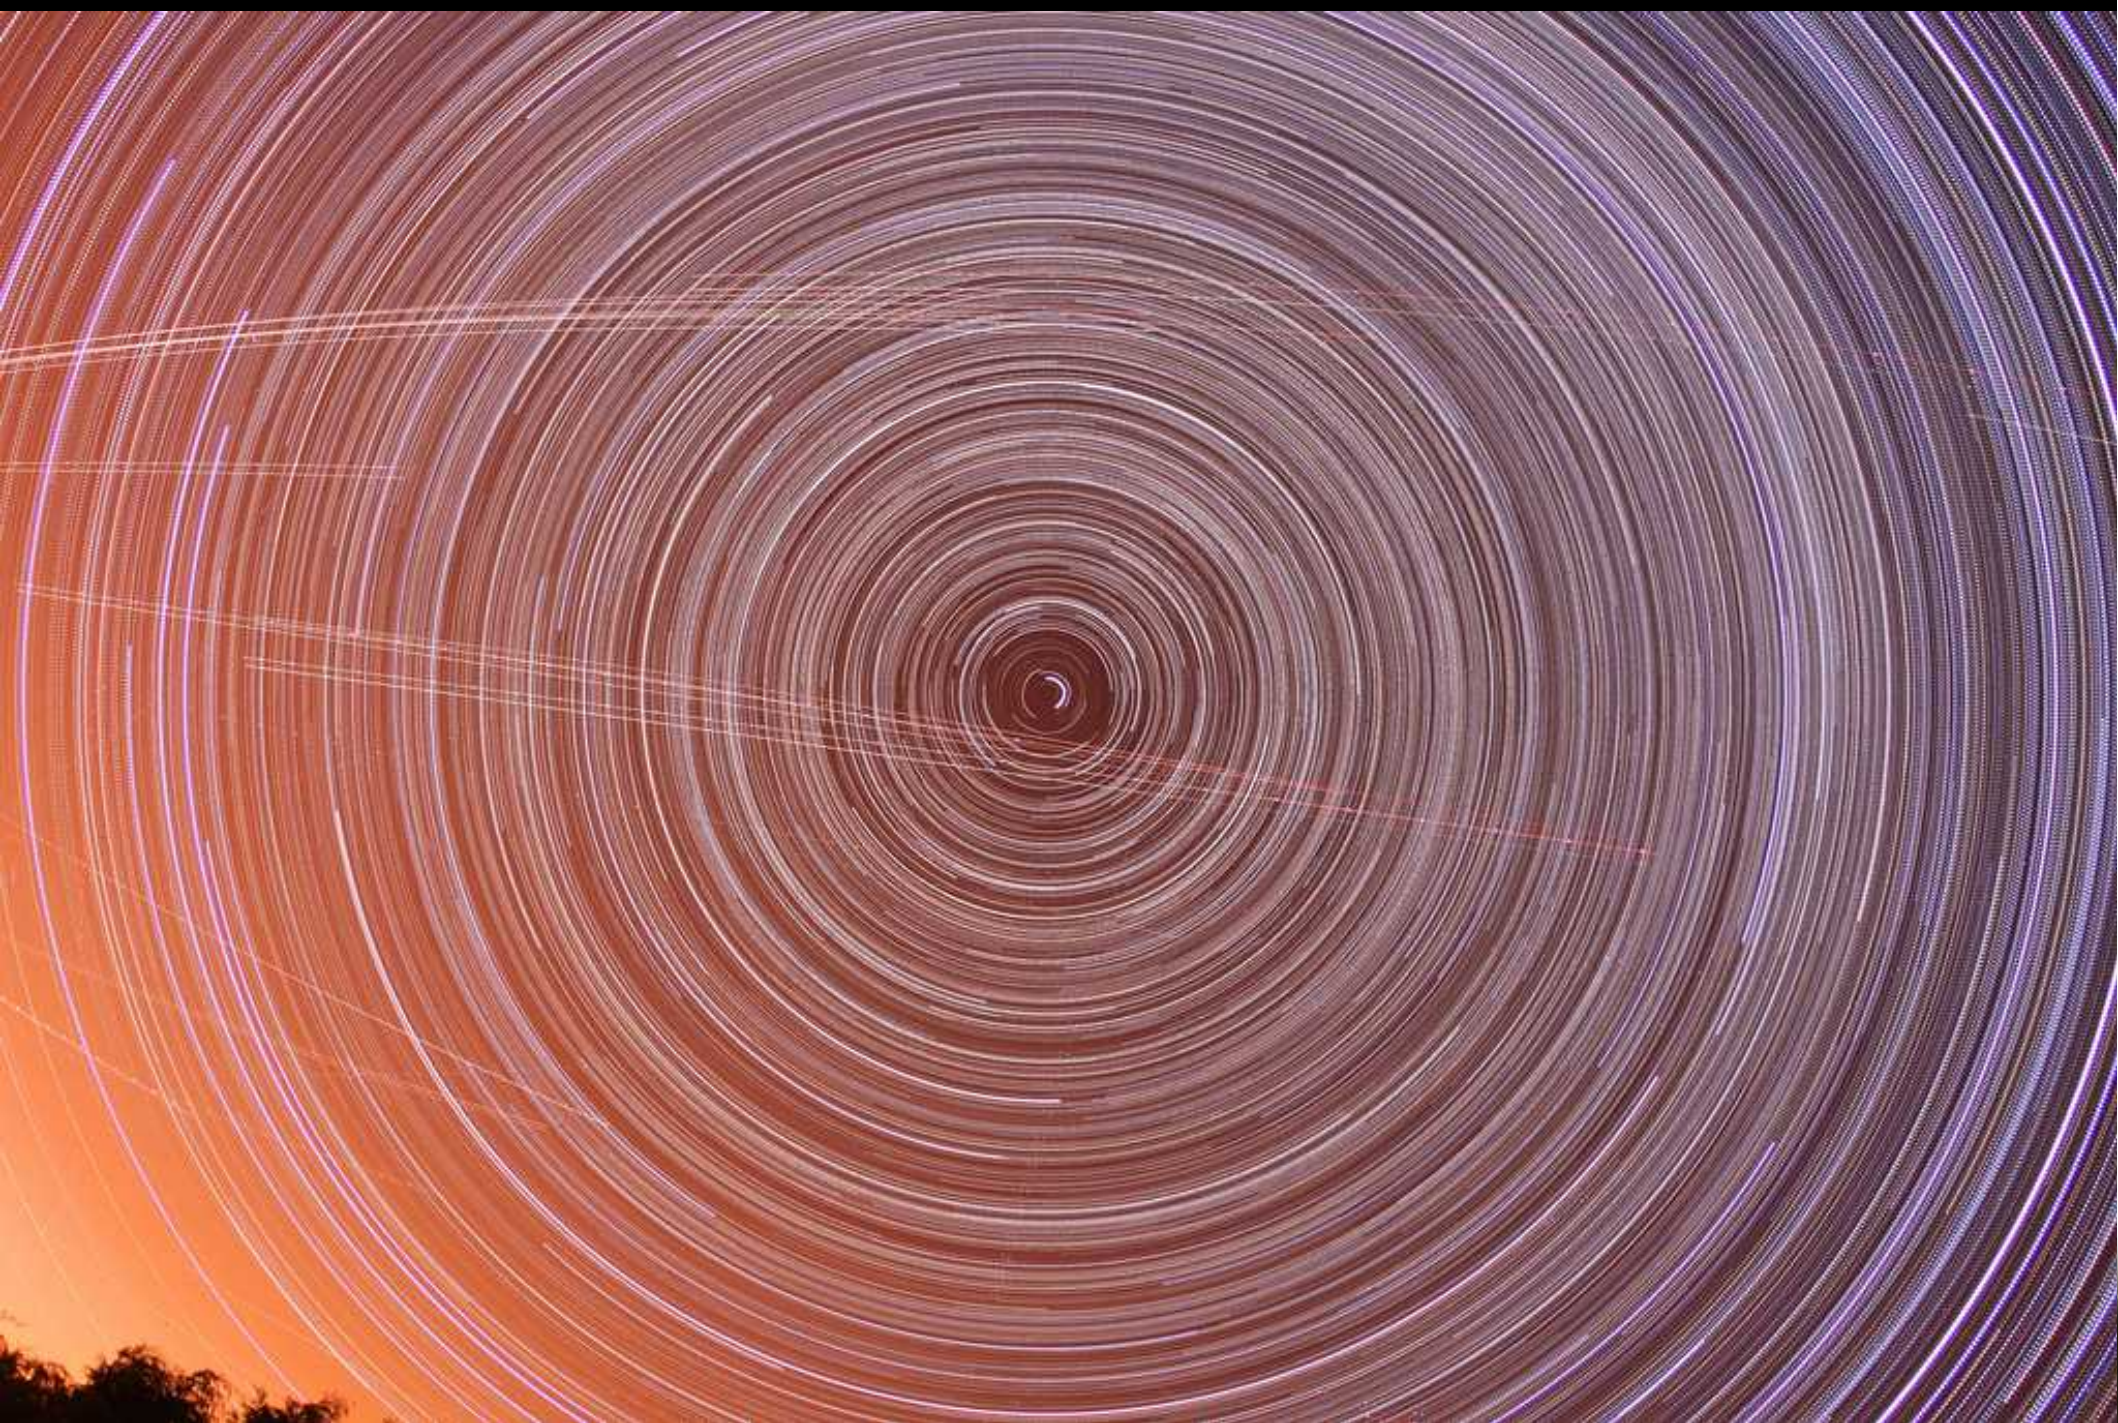

Star trails: from southern Spain

Star trails: from Hawai'i

Star trails: from Sussex

Star & planet trails: Mars & Regulus from Sussex

Moon trails: from Sussex
